

## Get your free Custom Blog Set Up!

OK So you are ready for your own domain name. Terrific! This is better than using a free server which is less personal and memorable.

In order for me to set this up for you, you must follow these directions first. Ready?

Here we go.

Step 1 [CLICK HERE](#) or go to this address –

<http://www.thebloggersdesktop.com/url/getdomain.html>

### Step 2: Sign Up Now

A screenshot of a web hosting advertisement. The ad features a blue background with white and yellow text. At the top, it says "HASSLE-FREE Web Hosting". Below this, there are three bullet points: "Unlimited Hosting Space", "Unlimited Bandwidth", and "Host UNLIMITED Domains". To the right, there is a starburst graphic that says "LIMITED TIME OFFER UP TO 6 MONTHS FREE!". Below the bullet points, it says "was \$4.95 Now only \$3.96\* /month". To the right of the price, it says "PLUS! FREE Domain FREE Setup And NO HIDDEN FEES!!". At the bottom right, there are two buttons: "SIGNUP NOW!" and "MORE INFO...". A black arrow points from the text "Step 2: Sign Up Now" to the "SIGNUP NOW!" button.

I have searched long and hard for a quality Web Host that was inexpensive and this is by far the best I have ever seen.

**You will see this:**

Domain Information

New - Purchase a new domain  
 Owned - I already own a domain

www.  .

Power Plan

7.95/mo. 6 Months (+ 14.95 Setup Fee)  
 6.95/mo. 1 Year 2 FREE Month(s)!  
 4.95/mo. 2 Years 4 FREE Month(s)!  
 3.96/mo. 3 Years 6 FREE Month(s)!

**Step one**, select Purchase a new domain. Type in your desired domain name. Remember to focus on your topic as you look for a good one. Once you are happy click “verify” - this will let you know if this name is available. Once you find the name you want, (as of this writing) you get it for **free for life**. So there is actually no purchase involved!

As for the length of time, you can make your selection. By far the best imaginable deal is to do this for three years. Go through the prompts and pay for your webhosting.

Once you have done this, you will receive a thank you email with your username and password to log in to your account. Wordpress is not yet installed on your account. If you would like to learn how to do this yourself, please feel free to refer to the handbook “setting up wordpress on your own server” This will undoubtedly help you in the long run.

However, because for now, you need to focus on creating content and making money, if you wish for me to set this up for you, I will gladly do so. You will need to forward me the welcome email you just received. Send it to [jared@thebloggersdesktop.com](mailto:jared@thebloggersdesktop.com) with the subject line “*please set up my wordpress for me*” I will verify you and then contact you with your login information.

Now you have a Domain name. Make sure to refer to the handbook called “exporting your old content to your new blog” so that you can rebuild your new blog with – well – your old content!
